Anilkumar R. Jaiswar

Sr. Android Developer | 8+ Years | Banking & Fintech Specialist

anil.rjx8@gmail.com +91 91375 10191 Mumbai, Maharashtra aniljaiswar.com Anilkumar R. Jaiswar

SUMMARY

Senior Android Developer with 8+ years of experience architecting secure, scalable enterprise banking and fintech applications. Specialized in mobile architecture, end-to-end VAPT remediation, and complex SDK integrations across HDFC, IDBI, IndusInd, and Kotak Bank.

EXPERIENCE

Sr. Android Developer
Apr 2021 — Present

Snapwork Technologies Pvt. Ltd. Chembur, Mumbai

Strategic Lead Android Engineer driving high-stakes banking applications for India's leading financial institutions, including HDFC, IDBI, IndusInd, and Kotak Mahindra.

- Led technical decision-making and designed secure architectures for enterprise mobile applications.
- Specialized in VAPT remediation, performance optimization, and complex SDK integrations.
- Led 5+ major banking client deliveries simultaneously, ensuring security, scalability, and quality.
- Mentored developers and collaborated across teams to maintain architectural standards and high-performance execution.

Mobile Application Developer
Nov 2018 — Aug 2019

RSalesArm IT Services Pvt. Ltd. Ghatkopar, Mumbai

Developed in-house apps (Royce, Tuneem Pro) featuring multimedia streaming, social interactions, event tracking, interactive quizzes, and camera-based attendance with real-time location capture.

- Alkem Laboratories — Alkepedia (10K+ Downloads): Feature development and maintenance.
- Reckitt Benckiser — RBF3 (Internal Training App): Feature development and maintenance.

Software Developer
Feb 2016 — Nov 2017

Clear Secured Services Pvt. Ltd. Sion, Mumbai

- Contributed to the development of 3 enterprise Android applications: Fencer Audit, Fencer Telecom, and Cleartask.
- Collaborated across SDLC phases including requirement analysis, feature implementation, testing, and Play Store deployment.

PROJECTS

HDFC Bank (Mobile App)
2023 — Present

HDFC Smart Account Opening : (Bank Employee Only)

- Remediated critical VAPT vulnerabilities and resolved 1,000+ SonarQube defects across multiple full audit cycles.
- Implemented custom Liveness Detection pipeline with eye-blink tracking, multi-face prevention, continuity, and lighting analysis.
- Integrated key financial SDKs including Novopay and government social security schemes (PMSBY/PMJJBY).
- Built 15+ custom plugins for Aadhaar QR parsing, salary slip PDF generation, barcode scanning, document signature cropping, and location watermarking.
- Integrated biometric capture workflows supporting Morpho L0/L1 and Precision fingerprint scanner hardware.
- Maintained app stability across Android migrations (API 33 to 35), eliminating ANRs and crashes under Microsoft Intune MDM.

IDBI Bank (Mobile App)
2023 — Present

play.google.com/store/apps/details?id=com.snapwork.IDBI

IDBI Bank GO Mobile+ : (1Cr+ Downloads)

- Remediated critical VAPT/ASST vulnerabilities across 2 audits, deploying Play Integrity anti-tampering defenses.
- Architected background scanner auditing 1,500+ apps against I4C and NCIIPC blacklists to neutralize remote threats.
- Implemented mandatory RBI digital controls across 3 security layers: device binding, SIM verification, and token handshakes.
- Integrated enterprise financial SDKs including Nuclei, Tridentity, Sarvatra UPI, Credit Card modules, and AppIce analytics.
- Developed 20+ Cordova plugins for QR/barcode scanning, PDF utilities, Cryptography, Biometrics, and OTPs.
- Enforced financial privacy control mechanisms to block unauthorized screen recordings, mirroring, and overlay attacks.

Bajaj Finance (Mobile App) Apr 2021 — Apr 2023

play.google.com/store/apps/details?id=org.altruist.BajajExperia

Bajaj Finance : UPI & Loan App : (10Cr+ Downloads)

- Developed complete onboarding and user settings, navigation drawer, dynamic FAQs, deep-link routing, and KPI logger.
- Remediated critical VAPT vulnerabilities across release cycles and engineered a Native C++ (JNI) data encryption module.
- Implemented dynamic feature modules for 10+ on-demand features, reducing initial app download size by 90%.
- Optimized app cold-start sequence by 30% while concurrently initializing 10+ third-party SDKs at launch.
- Built high-efficiency background caching across 400+ API endpoints, storing data in local DB with v2/v3 cache flags.

Bajaj Housing Finance (Mobile App) 2023 — Present

play.google.com/store/apps/details?id=com.bhfl

Bajaj Housing Finance : (1L+ Downloads)

- Remediated production VAPT findings across release cycles, hardening AES-256 data encryption and application security.
- Architected dynamic on-demand PDF rendering via Android App Bundles (AAB), reducing base app size by over 50%.
- Migrated Android SDKs (API 33–35), resolving recurring ANRs and crashes while ensuring Play Store compliance.

IndusInd Bank (Mobile App) 2023 — Jan 2025

play.google.com/store/apps/details?id=com.indusland.merchantapp

Indus Merchant Solutions (Rebranded INDIE for Business) : (1L+ Downloads)

- Remediated critical VAPT vulnerabilities and resolved 200+ SonarQube code quality defects across 3 audit cycles.
- Integrated 5 enterprise SDKs: OneSpan, MoEngage, AppsFlyer, Signzy VKYC, and Lookout threat defense.
- Built 5+ custom Cordova plugins for QR scanning, lock-screen QR generation, TTS alerts, and native device utilities.
- Hardened biometric login against edge cases, deep-link race conditions, and malicious app threats.

Kotak Mahindra Bank (Mobile App) 2023 — Jan 2025

play.google.com/store/apps/details?id=com.snapwork.kotak

Kotak fyn: Business Banking App : (1L+ Downloads)

- Remediated critical VAPT vulnerabilities across 2 audit cycles; utilized Frida for anti-tampering validation.
- Integrated the BioCatch SDK to detect behavioral anomalies in real time, effectively mitigating session hijacking and fraud.
- Architected a fraud-resistant device-binding framework with dual-SIM hardware detection and automated SMS OTP verification.

Toyota Financial Services India (Mobile App) 2023 — Present

play.google.com/store/apps/details?id=com.toyotafinance.projectvikram

Toyota Finance : (10K+ Downloads)

- Remediated critical VAPT vulnerabilities across 2 audit cycles, engineering screen-overlay defenses for financing workflows.
- Spearheaded target SDK 34 migration and overhauled Gradle/BundleTool pipelines and producing optimized AABs.
- Integrated Adstringo document compression SDK, automated SMS OTP reading, stabilized Base64 PDF parsing, and fixed Cordova communication bridges.

HDFC Securities (Mobile App) 2023

play.google.com/store/apps/details?id=com.hsl.investright

HDFC Securities InvestRight : (10L+ Downloads)

- Remediated critical VAPT vulnerabilities across 2 audits, enforcing SSL/TLS certificate pinning for trusted network APIs.
- Executed platform migration to target SDK 34, updating deprecated network libraries for 1M+ active traders.
- Resolved HSL Streamer socket connectivity issues and fixed 10+ FNO (Futures & Options) real-time data anomalies.

EDUCATION

B.Sc. Information Technology, 2015
Mumbai University Mumbai, Maharashtra, India
